2015 Annual SIRCA Young Researcher Workshop

CALL FOR PAPERS – SUBMISSION DEADLINE 31 AUGUST 2015

The fifth Young Researcher Workshop (YRW) led by SIRCA's Membership & Research Committee (MRC), will be held at the University of Technology, Sydney (UTS) over Thursday 19- Friday 20 November, 2015. Selected young researchers working or studying in Member universities will have the opportunity to travel to Sydney to present their current finance or accounting research and receive expert commentary on the research from a member of the MRC. SIRCA has had extremely positive feedback from the previous participants of our YRW events.

We now invite young researchers to submit a current research paper for possible inclusion in the fifth workshop. Submitted papers should be sufficiently advanced to benefit from feedback and suggestions from a seminar presentation. Abstracts will not be selected. Please submit papers to: callforpapers@sirca.org.au. Notification of the papers to be included will be made by 19 October 2015, at which time we will also advise the nominated MRC referee who will discuss the paper at the workshop. SIRCA will invite up to fifteen young researchers to the workshop as participants in the YRW5. SIRCA will meet all reasonable travel costs and provide accommodation for the selected attendees.

To qualify for inclusion at least one of the authors of the submitted paper must be a young researcher. We define a young researcher to be a person currently engaged in PhD research or one whose PhD thesis was completed less than five years ago. We particularly encourage young researchers in regional universities to apply for the workshop. We prefer papers that are sole authored by a young researcher, however jointly authored papers also qualify. SIRCA would like to track the progress of papers submitted at this workshop and therefore be kept informed of publication outcomes.

The MRC has the following academic members:

Kevin Davis (Chairman, Member of the SIRCA Limited Board)

Carole Comerton-Forde (University of Melbourne)

Dave Michayluk (University of Technology Sydney)

Henk Berkman (University of Auckland)

Mardi Dungey (University of Tasmania)

Petko Kalev (University of South Australia)

Robert Faff (University of Queensland)

Ray da Silva Rosa (University of Western Australia)
